

Halden Distribution Ltd. — file share permission matrix

Purpose: the single document that says who can read and who can change which shared folder.
Owner: IT (Muhammad Ibrahim Akmal) · **Approvers:** department heads (access is a business decision, not an IT decision) · **Review:** quarterly, plus on every joiner/mover/leaver (P2)

How to read it: RW = read and change · RO = read only · — = no access, and the folder is not even visible (Access-Based Enumeration is on). Every right is granted through a ****domain local group**** (DL_...); no individual user is ever named on a folder. To add someone, add them to the right role group (G_...) — the folder permission follows automatically.

Share (drive letter)	Finance	HR	Sales	Operations	Management	IT	Everyone else
Finance (F:) — DL_Share-Finance_RW / _RO	RW	—	—	—	RO	RO	—
HR (H:) — DL_Share-HR_RW / _RO	—	RW	—	—	RO	RO	—
Sales (S:) — DL_Share-Sales_RW	—	—	RW	—	RO	RO	—
Operations (O:) — DL_Share-Operations_RW	—	—	—	RW	RO	RO	—
Company (G:) — DL_Share-Company_RO	RO	RO	RO	RO	RO	RO	RO (all staff)
Users\$ (home drive) — DL_Share-Users_Home	own folder only (full control inside it)						—

- Notes:
- **IT** holds read access for support; IT does not hold write access to departmental content by design. Write access to a business folder is granted only by adding the person to that department's G_ role group.
 - **Management** holds read-only access across departments so directors can review, but cannot change departmental content.
 - **Administrators** retain full control at the file-server level for recovery; this is not used for day-to-day access and is recorded here deliberately rather than left implicit.
 - Every folder is protected by **FSRM file screens** that block executable files, and by **twice-daily shadow copies** for self-service restores.

Approval

Access is approved by the business, not by IT. Please complete the table below for your department and return it to IT; unapproved rows are removed at the quarterly review.

Department	Approver name	Role	Date	Signature / approval
Finance		Finance Director		
HR		HR Director		
Sales		Sales Director		
Operations / Warehouse		Operations Director		
Management		Managing Director		
IT		IT		

Status: designed and enforced in the lab; **the signature column is unsigned** until the department-head review actually happens (see `PROGRESS.md`). It is deliberately left blank rather than pre-filled.
