

P6 business deliverables

Everything here is written for the fictional company Halden Distribution Ltd. and converted to PDF by the central build; the Markdown is the source. Nothing in this folder reports a measured result — the artefacts are the business layer around the technical work, and the approval blocks are deliberately left unsigned until a review actually happens.

Artifact	Audience	Purpose	Website document link
p06-exec-brief.md	Managing Director, department heads	One page on why segmentation matters: one compromised laptop should not reach the whole company	./p06-exec-brief.pdf
p06-network-access-policy.md	Management (for approval)	Who may reach what, how remote access is granted, guest terms, exception process	./p06-network-access-policy.pdf
p06-zone-service-matrix-business.md	Managers	The same rules in business language, so a manager can check them without knowing ports	./p06-zone-service-matrix-business.pdf
p06-guest-wifi-notice.md	Visitors, reception	The acceptable-use notice displayed before a guest voucher is issued	./p06-guest-wifi-notice.pdf
p06-change-record.md	Management, change log (feeds P10)	Risk, impact, phase plan, test plan, comms plan and backout for the highest-risk change in the portfolio	./p06-change-record.pdf
p06-remote-access-user-guide.md	Staff working from home	1-page setup and troubleshooting guide for the VPN with MFA	./p06-remote-access-user-guide.pdf

How these relate to the technical artefacts

Business artifact	Technical source of truth
p06-network-access-policy.md	../configs/p06-zone-rule-matrix.csv / .md , ../docs/00-design.md §4-§8
p06-zone-service-matrix-business.md	The same rule matrix, restated without ports
p06-change-record.md	The phase plan and evidence plan in ../docs/00-design.md §11 and §13
p06-remote-access-user-guide.md	../configs/p06-nps-radius-policy.md and ../configs/p06-openvpn-server-profile.template.ovpn

Converting to PDF

The central build renders these Markdown files to PDF for the website links (the site's documents: entries in ../showcase.md point at the .pdf files). PDFs are generated centrally — do not hand-export them from this folder.
