

Halden Distribution Ltd. — KPI and reporting definitions

Purpose: define exactly what the service desk reports, how each measure is calculated, where the data comes from, who owns it and how often — so a number in a report means the same thing to everyone.

Owner: IT (Muhammad Ibrahim Akmal) · **Approver:** Managing Director · **Review:** annually **Status of the values:** none of these measures has been captured yet. The table below says **what will be measured and how**; it deliberately contains **no performance figures**. Actual results are added only from a real run (see `../docs/as-built.md`).

Halden Distribution Ltd. is the fictional company used in this portfolio.

1. Reporting principles

1. **A measure without a definition and a source is not used.** Each row below names the source.
2. **Business hours only** for anything time-based, on the configured Mon–Fri 08:00–18:00 calendar.
3. **No number is published that has not been measured.** Where data does not exist yet, the report says "not measured", not an estimate dressed as a fact.

1. **Synthetic data is labelled.** Until the system runs on real tickets, any demonstration report uses the synthetic dataset and says so on the page.

2. Service desk KPIs

KPI	Definition (how it is calculated)	Source	Frequency	Owner
Ticket volume	Count of tickets created in the period, grouped by ITIL category	GLPI reports	Monthly	IT Support
SLA compliance — TTO	% of tickets owned within the priority's Time To Own target	GLPI SLA report vs <code>configs/glpi-sla-priorities.json</code>	Monthly	IT Support
SLA compliance — TTR	% of tickets resolved within the priority's Time To Resolve target	GLPI SLA report	Monthly	IT Support
First-contact resolution (FCR)	% of tickets resolved on the first contact with no escalation and no reopen	GLPI (resolution on first assignment, no reopen)	Monthly	IT Support
Reopen rate	% of closed tickets reopened within 7 days	GLPI ticket history	Monthly	IT Support
Backlog	Open tickets at period end, by priority and age	GLPI	Weekly	IT Support
Top recurring issues	The 5 most frequent categories/subjects in the period	GLPI category report	Monthly	IT Support

3. Asset and CMDB KPIs

KPI	Definition	Source	Frequency	Owner
Asset count by type	CI records per CI type, by lifecycle state	GLPI assets	Monthly	IT / Systems
Reconciliation result	Count of Matched / Unknown-OnNetwork / Stale-InGlpi	scripts/02-Test-AssetReconciliation.ps1 CSV	Weekly	IT / Systems
Unknown-on-network devices	Devices seen on the network with no CMDB record (target 0)	same reconciliation CSV	Weekly	IT / Systems
CMDB drift	Missing-InCmdb / Orphan-InCmdb / DnsWithoutHost / Reserved-NotLeased	scripts/05-Test-CmdbDrift.ps1 CSV	Weekly	IT / Systems
Unauthorised software	Installed titles not on the P5 approved list (CIS 2.3)	GLPI software report	Monthly	IT / Systems
Warranty expiring	Assets whose warranty ends within 90 days	GLPI asset report	Monthly	IT Support
Unauthorised config changes	Changed config files with no approved change record	scripts/08-Test-ConfigDrift.ps1 CSV	Daily	IT / Systems

4. Vendor, contract and licence KPIs

KPI	Definition	Source	Frequency	Owner
Renewals due	Contracts reaching their 90/30-day notice line, with recommended action	GLPI contracts	Monthly	IT Support
Licence utilisation	Seats installed versus seats owned, per licence	GLPI licences + inventory	Monthly	IT Support
Licence waste	Seats owned but unused (cost view)	GLPI licences	Quarterly	IT Support
Vendor cases	Open vendor cases and their age against the contract terms	GLPI supplier tickets	Monthly	IT / Systems

5. Documentation KPIs

KPI	Definition	Source	Frequency	Owner
Pages past review	Pages whose review date has passed	BookStack + review reminder script	Monthly	IT
Knowledge-base coverage	Number of published KB articles mapped to service categories	BookStack / GLPI KB	Monthly	IT Support

6. The monthly report (one page)

Order of the one-page report: (1) headline — SLA compliance and backlog; (2) ticket volume by category; (3) first-contact resolution and reopen rate; (4) top 5 recurring issues ****with the permanent fix or problem record raised****; (5) asset reconciliation result; (6) renewals and licence utilisation; (7) documentation overdue. The first report establishes a baseline and states clearly that no "before" figure exists because nothing was tracked previously.

Status: definitions only. **No value in this sheet is a measured result.** The first real figures are added to `../README.md` and the monthly report only after the system has run and the data has come from GLPI.
